7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Title of the Practice 1) Academic Innovation: The following is the best practices which are adopted in our institution to exemplify the connection and relevance to motivate, engage and prompt students to learn and achieve, promote success and ambience atmosphere. • Flexibility in curriculum - Flexible Outcome Based Education (OBE) with full cycle curriculum: The institution implemented Fully Cycle OBE curriculum with students score card introduction on their

skills. The curriculum review took place with the changes in curriculum in terms of industry driven topics and syllabus which enables the students to be an industry ready candidate. The curriculum review involves all stake holders such as students, parents, industry experts and faculty members to contribute towards a better curriculum with the rationale of changes to be specifically recorded. This is a cyclic process and once in a year the annual review meeting will be conducted for all the programme(s). This helps in keep up the curriculum up-to-date to the market demand.

- Student Skill Card System Outcome based education is key in developing and testing the skills of a student. This is widely initiated by the institution in 2019. A full cycle of obe curriculum was developed and implemented for all the programme(s). A further milestone on the OBE initiative is the institution introduced Student Skill Card System in 2019. This encompasses the set of skills the student possess during the three year journey for a degree programme. This helps the students to choose their relevant field of job during the placement opportunities. The students were provided with the skill card at the end of every semester upon completing the respective subjects. The skill card reflects the strength and weakness of the students in the respective semester pertaining to the subject learned. This is one of the major achievement in implementation of OBE by the institution.
- Provision to earn Additional credits Students are provided with value added courses in which they can choose their interested area to enrich their knowledge and skills. This in turn providing them additional credits apart from the minimum required credits to graduate. This value added courses enrich the student set of skills and helps them to groom them based on the industry demands. Every programme is tied up with at least one value added course which is not included in the curriculum. The institution providing its students enormous opportunities to learn more and become a competent graduate in the market. enables the students and lecturers to have a smooth teaching and learning facilities. This helps in eradicating the disruption of teaching and learning process. faculty members actively engage in teaching-learning activities through the virtual mode. This brings the concept of education everywhere to the students. As the institution comprises of students outside the state and including overseas students.
- Implementation of Industrial exposure Training Students are provided with industrial exposure training in order them to be a industrial ready graduate. The class room teaching and learning helps them to be more knowledgeable students in their respective field. However, the students needs more on industrial exposure to explore the real time work place needs and demands. The institution initiated a 3 months industrial exposure training for Academic Monitoring report is been generated online on MKCL- (Maharashtra Knowledge Corporation Limited) with respect to students, their attendance record and syllabus coverage ,which is been reviewed by respective Class Advisor daily and it is updated ,HOD's reviewed it weekly. Academic Monitoring Committee meeting is conducted twice in a semester by respective Principal/ Advisor of the Institute and give their suggestions to improve the attendance, to map proper lesson plan with respect to syllabus and learning outcome. A hard copy is been maintained on daily basis attendance, where individual subject teacher has to maintained after every lecture/practical and entered it online on MKCL.

Activities ? Expert talks to enable students to Curricular and Co-Curricular practices ? Study tour and factory visits ? Technical Festivals / Exhibition / Student Competitions ? Competency Development / Personality Development Programmes ? Consultancy/ Research work to be done by the Students ? Under supervision of experts from Industry 2. Title of the Practice Improving Teaching - Learning Process Goal ? To ensure the completion of syllabus according to the academic planner of each department ? To encourage teachers to adapt to technological advancements including ICT adoption in class room teaching ? To improve pass percentage of the college at the university level examinations The context ? The syllabus coverage in some cases is being hurried and towards the end of the semester

where information are being crammed at once. This sluggish coverage initially and hurried coverage later should be avoided giving enough time to student in comprehending the topics and assimilating the facts. ? The teachers find it difficult to keep pace with the techno - savvy student learners. It has become essential for some of the teachers to adopt to the latest pedagogic styles and include ICT in class room teaching. The mismatch between the student learner and the teacher in the use and comfort of handling varieties of tools available for teaching - learning needs to be bridged. The practice ? Academic planner along with the calendar of events is uploaded on the website for information to students. ? The teaching - learning committee along with the heads of different departments monitor the pace of coverage of the syllabus. •?Informal feedback is obtained from students regarding the content delivery by different teachers. The teaching - learning committee members and the class teachers hold frequent informal meetings and cull out the information needed. ? Frequent assignments, tests and evaluation are conducted to improve performance in the semester - end examinations ? Class rooms is made ICT ready and many departments have the necessary tools for handling the class room teaching with the help of ICT. ? Science department staff train the teachers in the use of Power Point Presentations, browsing the internet for useful resources, uploading content on the college website, use of google docs for information sharing, etc. Evidence of Success ? Some of the teachers have adopted modern pedagogic styles and ICT in their classes. ? Some of the notes are uploaded on the college website. ? Appropriately paced and timely completion of syllabus ? Increased attendance in the classes ? Improvement in results. Problems encountered and Resources required. ? Development of animation based power point presentations in teaching, particularly in science subjects, has been hindered due to the want of in - house technical expertise. ? The demand for ICT resources is increasing and paucity of funds has been the biggest impediment which may dampen the spirit of technology adoption by teachers.
